Forecast for Wednesday 25 May 2022

Weather: Overcast skies and widespread rain as a front moves east across the Northwest Highlands in the early morning. This rain will turn showery and heavy at times during the morning becoming blustery in strong westerly winds on the hills during the afternoon, gales likely. Showers turn to sleet on higher summits by late afternoon before dying out as clear spells develop in the evening.

Chance of cloud-free hill tops above 800m: 40% increasing to 60% as low cloud associated with morning rain lifts and clears from late afternoon.

Low cloud and visibility: Broken low cloud in the morning with bases 4-500m. During the afternoon and evening cloud bases will rise above most summits with patches of low cloud around 6-700m. Moderate visibility in rain may turn poor in heavier showers. Later in the day visibility will become very good with some fine late evening conditions.
